Block Heading

BODY TEXT STYLES

Lead (1.125rem)

The lead paragraph used for introductory text. It is larger to catch attention immediately.

Base (1rem)

The standard body copy size used for the majority of long-form text. Highly legible and clean.

Small (0.875rem)

Smaller text used for captions, helper text, metrics, and secondary navigation links.

Shadows & Cards

Soft Shadow (shadow-soft)

`0 1px 3px rgba(0,0,0,.05)`

Used for subtle elevation on containers and standard sections.

Card Shadow (shadow-card)

`0 1px 3px rgba(0,0,0,.08)`

Main elevation for cards, hover states, and interactive feature blocks.

Card Radius (rounded-card)

8px

Standard border radius for consistent squared-but-soft corners on UI elements.

UI Components

BUTTONS

Primary Dark

`bg-gray-900 / hover:bg-gray-800`

Brand Teal Action

`bg-primary-600 / hover:...700`

Highlight Orange

`bg-accent-500 / hover:...600`

Outline Button

`border-gray-300 / hover:bg-gray-50`

Design Principles

- **Clean & Minimal:** Let the content and typography breathe with adequate spacing (generous margins & paddings like `section-padding`).
- **Subtle Elevation:** Prefer soft outlines and subtle shadow shifts over heavy dropshadows. Rely on `border-gray-200` for definition.
- **Trustworthy Palettes:** Base the experience heavily on neutral typography (Gray 600, 900) while injecting Primary Teal for main actions, and Accent Orange for warm highlights.
